www.cleverq.de

With the cleverQ e-Ticket module, you can easily assign digital waiting tickets to your customers and thus reduce the amount of waiting in your waiting area. The result is fewer complaints and stress-free work for employees.

The e-Ticket module can be integrated into your corporate environment with just a few clicks. You and your customers can now take advantage of the cleverQ system.

### Always & everywhere

Get a overview of the persons currently waiting

### Online tickets

easy to create, assign & delete

### Waiting circles

customizable & configurable

### Optimisation

of offers & staff deployment

## Printer

You can also use the e-Ticket module if you already have call systems in use, e.g. Ticketprinter from MEM-O-MATIC. cleverQ can be easily connected to the devices thanks to a small connection box. This allows you to benefit from all the advantages of the cleverQ online system without having to change your existing infrastructure.

## Cloud

The cleverQ e-Ticket module is a cloud-based application with servers in Germany and highest security standards. The solution is quickly set up, immediately operational and easy to use. Constant availability is guaranteed by SaaS providers (Software as a Service).
