info@cleverq.de

www.cleverq.de

With the cleverQ pager module, customers have the opportunity to move freely while waiting and do not have to spend the whole time in a waiting room.

A ticket is assigned to the customer at reception and a pager is handed out at the same time. The pager signals the customer on his call-up.

Ticket & Pager are handed out

Customer can move freely

Easy call via pager

Branding

Like all cleverQ modules, the pager module can be set up quickly and controlled centrally. Of course, we can design the pagers according to your wishes and adapt them to your corporate design.

Technologiepartner

Our technology partner JTECH is one of the largest pager providers worldwide. Together we developed the cleverQ pager module.

Since 1988, JTECH has developed innovative, easy-to-use and affordable pager and SMS solutions for a variety of companies worldwide. The company has been an industry leader in paging and messaging solutions for over 25 years.
