The cleverQ Public Page Information module enables you to provide your monitors in the waiting area with an individual “call mask”. The hosting of your individual call page is done by our cleverQ servers.

This can be accessed with any standard browser and contains information about the number of people currently waiting, the average waiting time and the last call.

Individual page with your CI

Your online page (call mask) is customizable according to your wishes

Hosting on cleverQ servers

The cleverQ servers are subject to the highest security standards. The servers are located exclusively in Germany.

Always up-to-date information

Thanks to cleverQ's fail-safe servers, your call system is always up-to-date and reliable.
